

## SAFETY

Safety is a way of Life  
and always first priority

## HEALTH

You only live once but if you do it right  
once is enough

## ENVIRONMENT

When we heal the earth we  
heal ourselves

# About wiSHE

wiSHE is a comprehensive and integrated web application built on the latest technologies that enable an organization to streamline and implement HSE strategies.

With a broad range of modules, wiSHE addresses Employee Health & Safety Management, Management of Dangerous & Hazardous Goods, Waste & Recycling Management, Environmental Management & Regulatory Compliance.

wiSHE helps companies run safer by identifying, mitigating, and managing workplace risks efficiently. The integrated approach adopted by wiSHE connects all disparate systems & processes into a central repository making information accessible globally and in real time.

Using simplified features, an easily deployable and lightweight intuitive user interface, easily customizable screens and web-based technologies leaving zero client footprint, it is now easier to record & report occupational HSE risks.

# SAFETY

Occupational Health and Safety is an area concerned with protecting safety, health and welfare of people engaged at work. The goal of OHS program is to foster a safe and healthy working environment.

wiSHE with its number of pre-configured modules ensure the safety criteria are met by recording, managing, and retrieving safety information on demand and in real-time. Using wiSHE, practitioners can focus more on managing safety and injury prevention rather than manual data processing and producing reports from a number of disparate systems

## The many modules of wiSHE helps organisations in

- Setting Safety targets and objectives
- Promoting effective communication organisation-wide
- Managing regulatory compliance and state requirements
- Complying with national and international standards (AS/NZS 4801, ISO 45001)
- Identifying safety hazards, assess risk.
- Ensuring remedial actions required to maintain an acceptable level of safety are implemented
- Proactively mitigate risks thereby reducing incidents
- Providing continuous monitoring and regular assessment of the safety level achieved
- Aims to make continuous improvement to the overall level of Safety
- Making informed decisions using dashboards, notifications , trend charts
- Generating reports, create user configurable ad-hoc reports

### Safety Suite consists of the following modules

- ✓ Hazard & Risk Management
- ✓ Incident & Investigation Management
- ✓ Inspections, and Audits
- ✓ Work Permits
- ✓ Job Safety Analysis
- ✓ Equipment Management
- ✓ Document Management
- ✓ e-Learning

### Common features of all Safety modules

- ✓ Automatic alerts to key users
- ✓ Multiple drillable dashboards
- ✓ Standard drillable reports
- ✓ Dynamic screen management
- ✓ Configure automatic email notification
- ✓ Import & Export features
- ✓ Supports i18N
- ✓ Classification based characteristics

# HEALTH

Healthy workplaces have lower turnover, less stress and higher satisfaction.

Take care of your body and it takes care of you.

Occupational Health deals with all aspects of health & safety in the workplace and has strong focus on the prevention of injury and occupational diseases.

The health of the workers has several determinants, including risk factors at the workplace leading to cancers, accidents, musculoskeletal diseases, respiratory diseases, hearing loss stress-related disorders and communicable diseases.

The integrated modules of wiSHE help in monitoring employee's health & safety with its complete support for industrial hygiene, safety, and occupational health. wiSHE helps in tracking organisation-wide employee health records and making informed decisions on creating a healthy and conducive work atmosphere. Be it pre-employment medical assessment or ongoing periodic health assessments wiSHE helps in recording and tracking an employee's health throughout their period of employment.

Record injuries to an employee with all relevant details for accurate reports and trend analysis. Using wiSHE it is easy to locate skilled first aid-trained personnel, fire warden, and maintain a list of medical supplies at a particular location. Confidential health records can be accessed only by the relevant authority and the concerned individual.

**wiSHE enables medical surveillance at your finger tips**

## Health Suite consists of following modules

- ✓ Audio metric testing
- ✓ Vision testing
- ✓ Bloodglucose and other pathogenic test results.
- ✓ Injury Management – Capture injury details
- ✓ Rehabilitation Management
- ✓ Return to work case management
- ✓ Medical surveillance with automatic triggers for notification
- ✓ New Employee induction
- ✓ Complies with ISO 45001:2008, New Labour codes, OSHA, Work Cover etc.

## Common features of all Health modules

- ✓ Automatic alerts to key users
- ✓ Multiple drillable dashboards
- ✓ Standard drillable reports
- ✓ Dynamic screen management
- ✓ Configure automatic email notification
- ✓ Import & Export features
- ✓ Supports i18N
- ✓ Classification based characteristics
- ✓ Auto fill default values – reduced data entry
- ✓ Customisable diagnostic forms, reports

# ENVIRONMENT

We can't change the past but future we can and we should.

Reduce, Reuse and Recycle for a better tomorrow.

Every business no matter how small or big contributes to the degradation of the surrounding environment under which it operates. The contribution is in form of emissions, effluents, and deforestation. The environmental impact can be direct or indirect but definite. A number of statutory bodies in various countries strictly monitor the environmental impact and organizations are required to operate within the control limits.

**wiSHE** has a number of modules to measure, monitor, and analyze various environmental parameters and take necessary corrective actions. Additionally, wiSHE can integrate with stack monitoring equipment for online measurement and monitoring of ambient air quality management. wiSHE's audit module can be configured to support ISO 14001:2013 international standard.

ISO 14001 sets out how an organisation can implement an effective EMS and wiSHE is a comprehensive web-based integrated management system that will help in meeting the stringent requirements of the standard. With its intuitive user interface, wiSHE makes it easy for users to input, retrieve, and analyze data quickly to make informed decisions.

**Earth – It's only one of its kinds**

**Let's take care of it**

## Environment Suite consists of following modules

- ✓ Maintain Aspect/Impact Register
- ✓ Emission Management
- ✓ Effluent Management
- ✓ Carbon foot print Management
- ✓ SPM Management
- ✓ Waste Management
- ✓ Battery recycling
- ✓ e-Recycling
- ✓ Support SA 8000 - CSR

## Common features of all Environmental modules

- ✓ Automatic alerts to key users
- ✓ Multiple drillable dashboards
- ✓ Standard drillable reports
- ✓ Dynamic screen management
- ✓ Configure automatic email notification
- ✓ Import & Export features
- ✓ Supports i18N
- ✓ Classification based characteristics
- ✓ Auto fill default values – reduced data entry
